

Family Testimonials

Our daughter absolutely thrived at Growing Faith preschool. She has a shy personality, and we were looking for a smaller classroom setting. She learned how to write her name, all of her letters and was well prepared for kindergarten. She made great friends and absolutely loved her teachers. We are very happy with her experience.

-Wendy Quigel

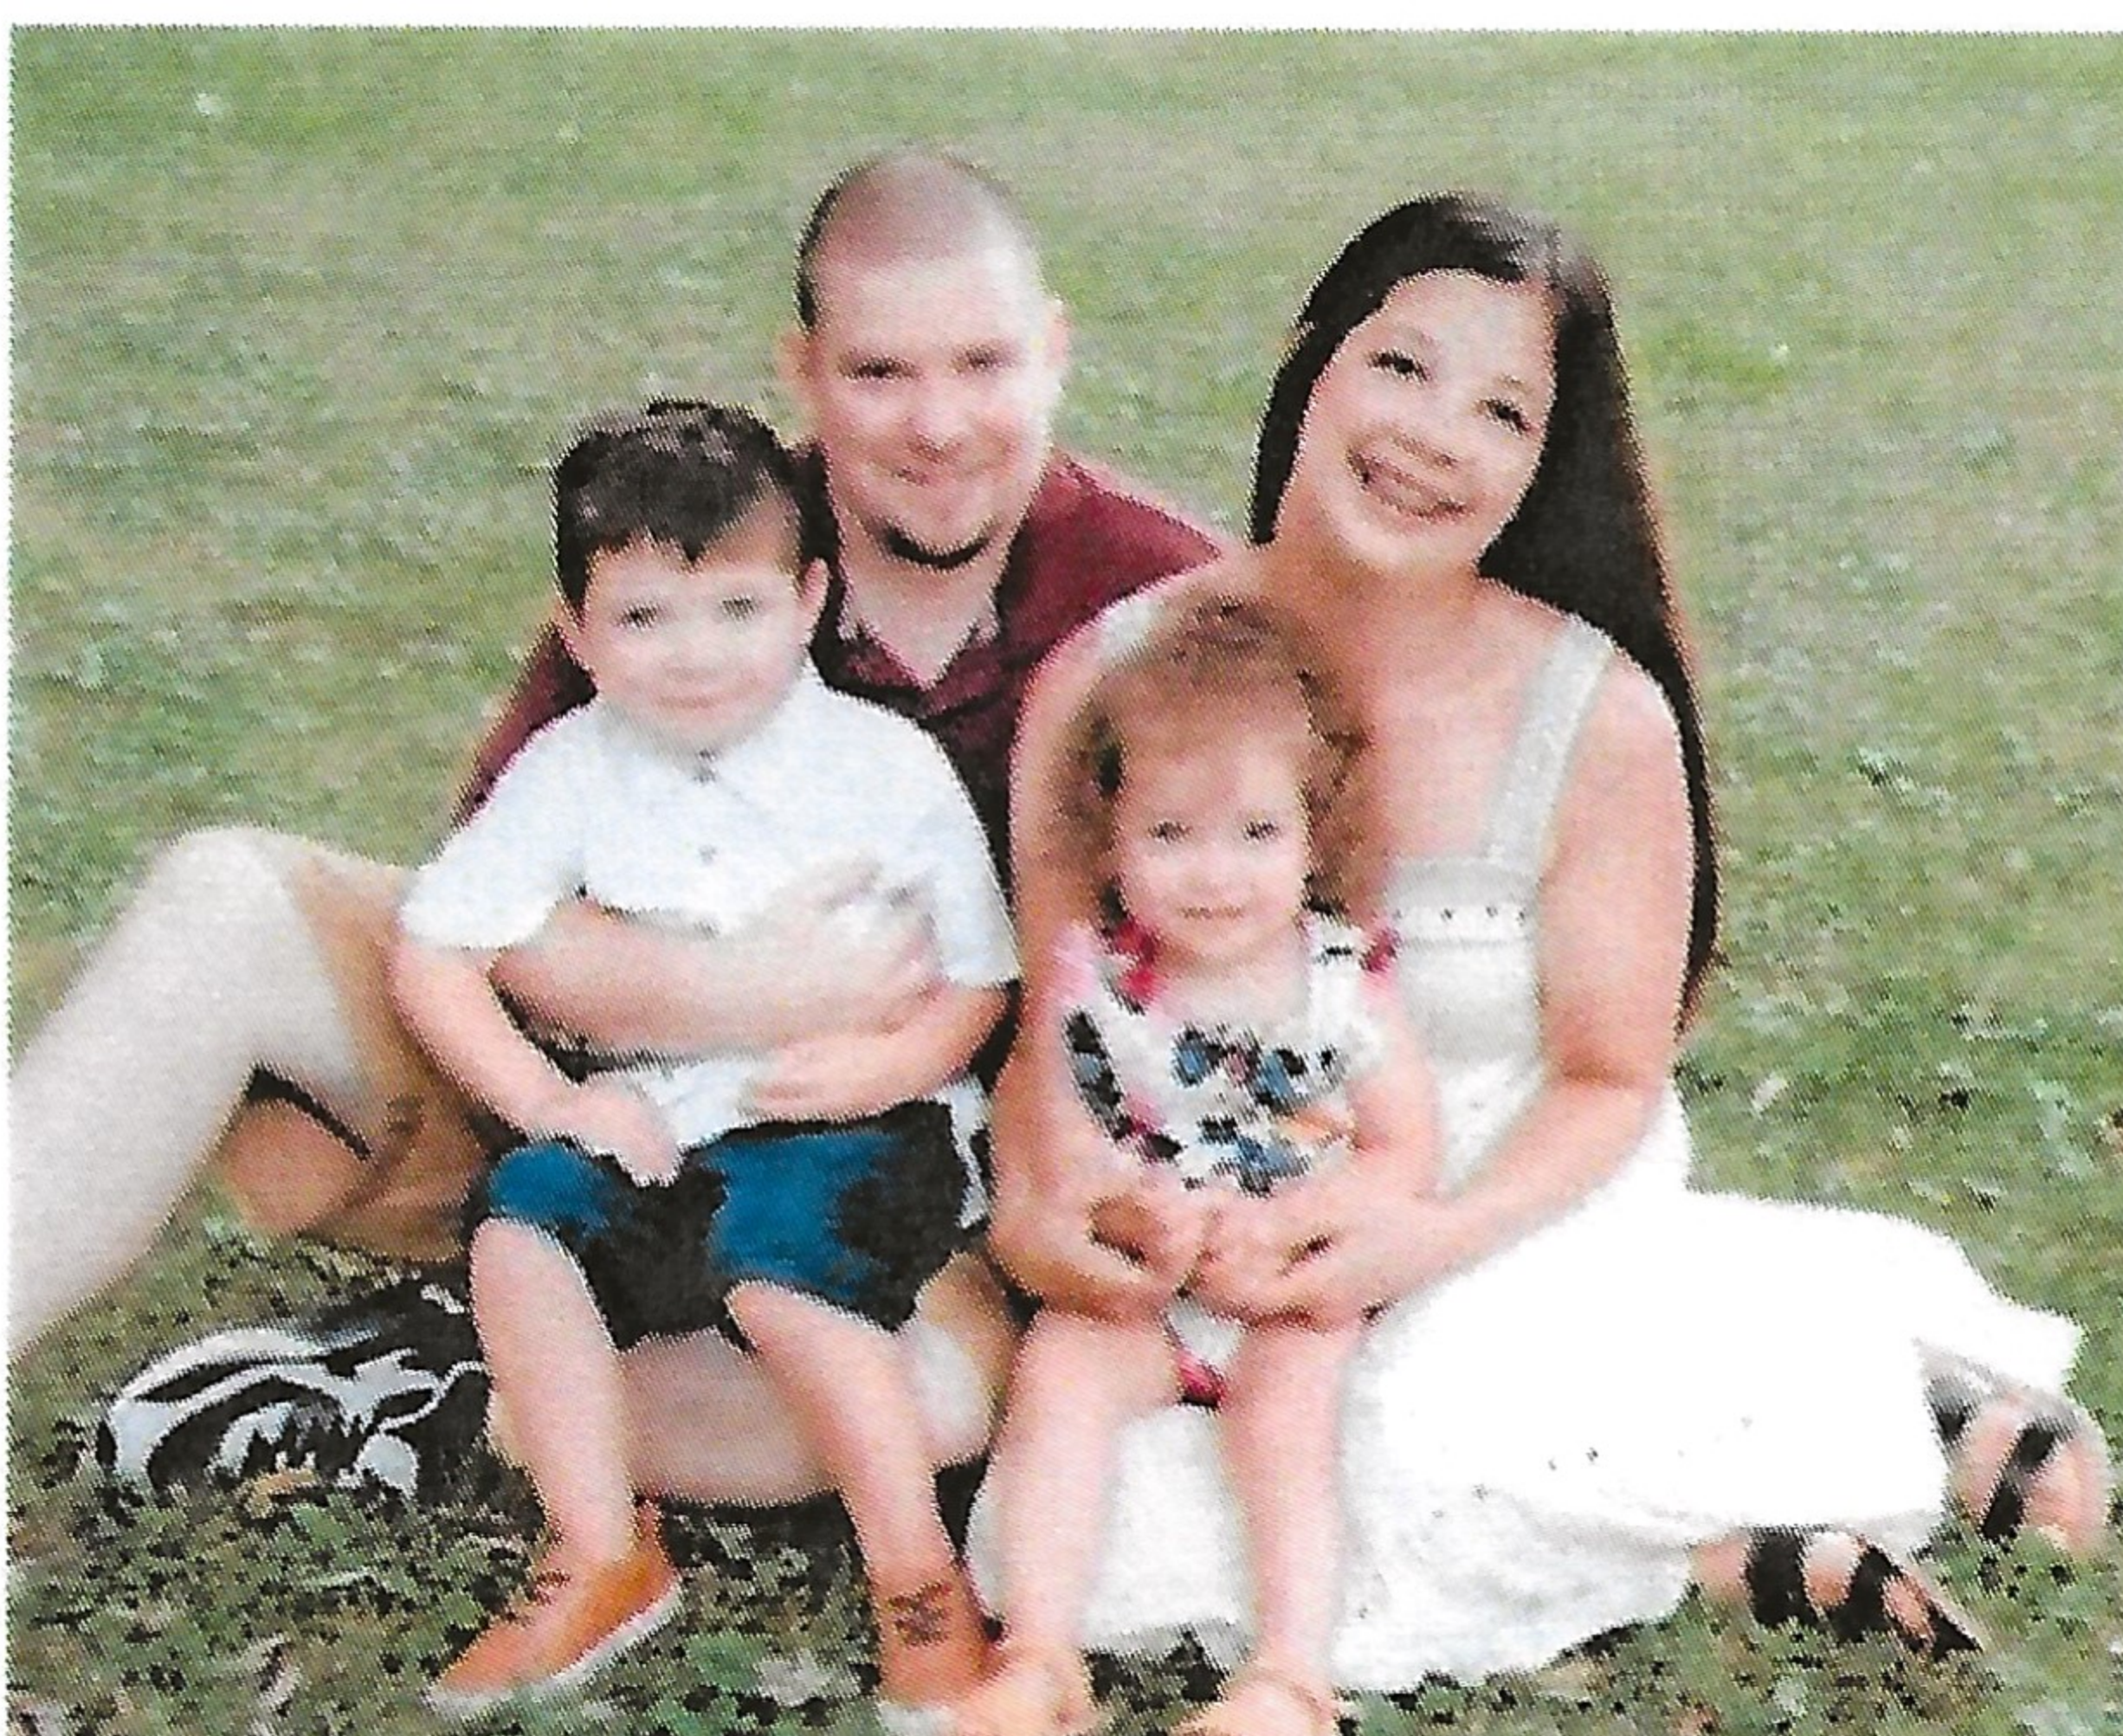

What we love most about Growing Faith Preschool is the small class size allowing each students' education to be personalized to his/her needs. Our son woke up excited to go to school each morning and we owe that love of learning to Growing Faith Preschool. I'm a mother of three and can't always spend enough time practicing writing with him but after his time at Growing Faith our son writes his name on his own and can identify every letter. He made friends and developed an even stronger love for God. We will definitely be sending our younger two as well.

-Kelsey Baysore

James started preschool at age 3 and it was the best decision for our family. Growing Faith gave him the opportunity to grow in scripture and education by providing personalized learning experiences. For example, James hates to color but they discovered that by using markers or dabbers he (excitedly) would practice his letters. These students weren't just learning their ABC's and 1, 2, 3's but learning many more valuable skills - from building a garden, to singing songs, arts & crafts, and cooking! The small group setting allowed for their individual interests to shine and promoted building positive relationships within the preschool, church, and community. In the words of James, "Miss Kerri and Miss Heather always make me smile. They love Jesus and me!"

-Brittany Frey

We loved Growing Faith Preschool for many reasons. The small class sizes really allowed more one on one focus with each student. We loved the faith-based teachings and activities that were taught daily! Gannon learned so much this year and had so much fun! You guys were so patient and kind! You had plenty of activities that included the families as well! I could go on and on! Thank you again!
